C.—M. F. Newbould, secre
 ningham Liberal Associatio
 January 1, 1913, while fig
 teer in the Greek Army
 Turkey.

WEDNESFIELD.—The tinning of iron pots is
 a Birmingham invention, the process being
 patented in 1779 by Jonathan Taylor. The
 method was first put into use by Messrs. Izon
 and Whitehurst at their foundry in Duke
 Street.

DIRECTIONS FOR USING THE DIGESTER.

The great importance and utility of this valuable Utensil, the DIGESTER, not only to poor Families, but to the Public in general, in producing a larger quantity of wholesome and nourishing Food, by a much cheaper method than has ever been hitherto obtained, is a matter of such serious and interesting consideration, as cannot be too earnestly recommended to those who make Economy in the support of their families an object of their attention.

The chief, and indeed the only thing necessary to be done, is to direct a proper mode of using it to most advantage : and this mode is both simple and easy.

Care must be taken in filling the Digester, to leave room enough for the Steam to pass off through the Valve at the Top of the Cover. This may be done by filling the Digester only three Parts full of Water, and bruised Bones or Meat, which it is to be noticed are all put in together. It must then be placed NEAR A SLOW FIRE, SO AS ONLY TO SIMMER, (more heat injures the quality); and this it must do for the space of Eight, or Ten Hours. After this has been done, the Soup is to be strained through a hair sieve or cullender, in order to separate any bits of bones. The Soup is then to be put in the Digester again, and after whatever Vegetables, Spices, &c., are thought necessary are added, the whole is to be well boiled together for an hour or two, and it will be then fit for immediate use.

It is worth noticing, that those who have never eaten soup prepared in this way have no idea how palatable, nutritious, and good a soup is produced.

 In putting on the Lid of the Digester, take care that a mark, thus (X), on the Lid, is opposite to a similar one on the Digester.
